American Experience #3505 "The Sun Queen" For nearly 50 years, chemical engineer and inventor Maria Telkes applied her prodigious intellect to harnessing the power of the sun. She designed and built the world's first successfully solar-heated modern residence and identified a promising new chemical that, for the first time, could store solar heat like a battery. And yet, along the way, she was undercut and thwarted by her boss and colleagues — all men — at MIT. Despite these obstacles, Telkes persevered and, upon her death in 1995, held more than 20 patents. She is now recognized as a visionary pioneer in the field of sustainable energy. An unexpected and largely forgotten heroine, Telkes was remarkable in her vision and tenacity — a scientist and a woman in every way ahead of her time. Her research and innovations from the 1930s through the '70s continue to shape how we power our lives today. **Tuesday, March 12 at 8 p.m.**

17

Hijos Del Desierto (Sons of the Desert) An exciting period drama set in northern Chile against a backdrop of political upheaval and international intrigue in the 1930s. The story begins in 1907 during a salt miners strike when the parents of brothers Pedro (Gaston Salgado, *Ines of My Soul*) and Gaspar (Jorge Arecheta, *La Jauria*) are massacred by the government while protesting for better working conditions in the mines. In the aftermath of this devastating loss, the young brothers face another heartbreak as they are forcibly separated never to see each other again for 30 years. When they meet again they are unaware that they are brothers and become enemies as they stand on opposite sides of the law and fall in love with the same woman. **Sunday, March 17 at 10 p.m.**

28

Daytripper #1212 "Adrenaline, Texas" Chet and crew try their hand at a new sport while taking a daring walk down memory lane with a look at some of the craziest things they've done in Texas. **Thursday, March 28 at 8 p.m.**
